Lectures

22/9

- Live surgery I (bipolar resection)
- Preoperative considerations to avoid complications during and after TURB
- Resection biopsies from the prostatic urethra and bladder neck and re-resection (how and in which patients?)
- Live surgery II (en bloc resection)
- TURB-techniques I (NBI and PDD): What are the evidence?
- TURB-techniques II (bipolar-resection and en-bloc-resection): What are the evidences?
- Biomarkers for progression in bladder cancer stage T1
- Riskfactors for recurrence in NMIBC

23/9

- Differential diagnostics in urothelial carcinoma
- Live surgery III (invasive bladder cancer)
- Adjuvant options after TURB (chemotherapy, BCG, continuous irrigation)
- Live surgery IV (re-resection)
- Device-assisted intravesical treatment (thermochemotherapy and electromotive drug administration (EMDA)) – of any use?

Organizer: Nordic Urothelial Cancer Group of the Scandinavian Urological Association in association with Medac

Faculty: J Bjerregard (Den), P Boström (Fin), S Gudjonsson (Isl), P-U Malmström (Swe), and F Liedberg (Swe)
